Aside from San German, Cabo Rojo and Cidra, are you aware of any VI sampling that is planned or may be requested for any of our Caribbean sites?

Thanks!

Chloe

Subject: Big picture look at VI in PR

Hey Everyone,

I know we are planning to have ERT down in PR to do some VI sampling at Cabo Rojo and San German very soon. I just wanted to take a step back and check out all of the site in PR and what our VI plan is for them as well. Does every site in PR require VI sampling? And if so, do we have a schedule for when we want the sampling performed? I know we like to do it in the winter months, but PR does not really have a winter. I am not sure how this impacts our sampling schedule.

Thanks. Courtney
